I'm a 31-year-old web developer from France with a bachelor's level certification in software development, specializing in Next.js and the React ecosystem.

PROFESSIONAL EXPERIENCE

Founder & Full Stack Developer

omorsea.com - Environmental Cleanup Platform

September 2024 – Present

I founded a platform that connects people to organize and participate in environmental cleanup events worldwide; featuring interactive maps, real-time notifications, and user authentication, all with responsive and modern design across devices.

- Building a **full-stack** application using **Next.js / React** (front-end) and **Node.js** with **Express.js** (back-end)
- Used **PostgreSQL** with **Prisma ORM** for **database management**
- Developed an **authentication system** from scratch using **JWT**, **cookies.**
- Used **Zod** for schema validation and **React Hook Form** for form validation
- Implemented **Server-Side Rendering (SSR)**, **Server Actions**, and **Client Components** for optimal performance and user experience
- Integrated **WebSockets** for real-time communication
- Utilized **Tailwind CSS** for **responsive design**
- Integrated **Google Maps API** and additional user-centric features.

Freelance Web Developer

Map to Moon Agency
February 2024 – September 2024

- Developed Progressive Web App from scratch with **Next.js**, using **Server-side rendering (SSR)**, **Server Actions** and **Client components** for optimized performance.
- Focused on **SEO optimization** through Next.js features
- Integrated **Strapi** as a **headless CMS** for streamlined **content management**
- Manipulated various **APIs**, including **RESTful services**
- Implemented **internationalization** with **i18n** for **multi-language support**
- Integrated **SCSS** for **responsive design**
- Prioritized **clean**, **scalable** code and **reusable** components

Previous Experience in Hospitality

2016 – 2022

*Various roles in the tourism industry, where I gained soft skills like **communication**, **organization**, **teamwork** and **customer service**. These experiences improved my **attention to detail** and **adaptability**, which I now apply to my web development career.*

EDUCATION

- **JavaScript React Application Developer Certification.**

Bachelor's Level (Level 6 RNCP - European Qualifications Framework equivalent)
April 2025

- **Web Integrators Certification**

Associate's Degree Level (Level 5 RNCP - European Qualifications Framework equivalent)
Certified – November 2023

- **Self Learning & Development**

Continuous Learning.

- Completed numerous online courses and tutorials in web development technologies
- Built multiple personal projects to reinforce learning
- participation in coding communities and forums
- Constant exploration of new technologies and best practices

SKILLS

Languages & Frameworks

JavaScript, TypeScript, React, Next.js, Node.js, Express.js, PostgreSQL, HTML, CSS, SCSS, Tailwind CSS, Styled Components, Framer Motion, GSAP...

Development Practices

Agile/Kanban workflows, Component-Based Architecture, Server-Side Rendering (SSR), Progressive Web App (PWA) Development, SEO Optimization, Authentication (JWT, cookies, encryption), Responsive Design

Professional Strengths

Quick learner with a strong curiosity and adaptability, always willing to learn new technologies and think outside the box.

Languages

- French (Native)
- English (Fluent)
- Greek (Beginner)
