Web developer specialized in React ecosystem, with a bachelor's-level certification in software development and experience building SaaS, AI features, and full-stack applications.

PROFESSIONAL EXPERIENCE

Frontend Engineer

Hosthub (Syncbnb) – Short-term rental property management platform

May 2025 – Present

Contributing to admin/user web apps that help thousands of property managers automate guest communication and rental operations.

- Built and maintained **UI components** in **React + TypeScript** with **Chakra UI** and **SCSS**.
- Developed **Admin and User SPAs** with **AI features**, dashboards, and automation tools.
- Wrote **unit and integration tests** with **Jest** and **React Testing Library**.
- Followed **coding standards** to ensure clean, maintainable code.
- Collaborated in **Agile workflows** with daily calls, GitHub PRs, and Figma designs.

Founder & Full Stack Developer

omorsea.com - Environmental Cleanup Platform

September 2024 – Present

Founded a platform that connects people to organize and participate in environmental cleanup events worldwide; featuring interactive maps, real-time notifications, and user authentication, all with responsive and modern design across devices.

- Building a **full-stack** application using **Next.js / React** (front-end) and **Node.js** with **Express.js** (back-end)
- Used **PostgreSQL** with **Prisma ORM** for **database management**
- Developed an **authentication system** from scratch using **JWT**, **cookies**.
- Used **Zod** for schema validation and **React Hook Form** for form validation
- Implemented **Server-Side Rendering (SSR)**, **Server Actions**, and **Client Components** for optimal performance and user experience
- Integrated **WebSockets** for real-time communication
- Utilized **Tailwind CSS** for **responsive design**
- Integrated **Google Maps API** and additional user-centric features.

Freelance Web Developer

Map to Moon Agency

February 2024 – September 2024

- Developed Progressive Web App from scratch with **Next.js**, using **Server-side rendering (SSR)**, **Server Actions** and **Client components** for optimized performance.
- Focused on **SEO optimization** through Next.js features
- Integrated **Strapi** as a **headless CMS** for streamlined **content management**
- Manipulated various **APIs**, including **RESTful services**
- Implemented **internationalization** with **i18n** for **multi-language support**
- Integrated **SCSS** for **responsive design**
- Prioritized **clean, scalable** code and **reusable** components

Previous Experience in Hospitality

2016 – 2022

Developed transferable skills in **communication**, **teamwork**, and **customer service** in various tourism roles.

EDUCATION

- **JavaScript React Application Developer Certification.**

Bachelor's Level (Level 6 RNCP - European Qualifications Framework equivalent)

April 2025

- **Web Integrators Certification**

Associate's Degree Level (Level 5 RNCP - European Qualifications Framework equivalent)

Certified – November 2023

SKILLS

Languages & Frameworks

JavaScript, TypeScript, React, Next.js, Redux, TanStack, Node.js, Express.js, PostgreSQL, HTML, CSS, SCSS, Tailwind CSS, Styled Components, Framer Motion, GSAP...

Development Practices

Agile/Kanban workflows, Component-Based Architecture, Server-Side Rendering (SSR), Progressive Web App (PWA) Development, SEO Optimization, Authentication (JWT, cookies, encryption), Responsive Design

Professional Strengths

Quick learner with a strong curiosity and adaptability, always willing to learn new technologies and think outside the box.

Languages

- French (Native)
- English (Fluent)
- Greek (Beginner)
